

Review of dietetic documentation and clinical handover processes at Peninsula Health (PH)

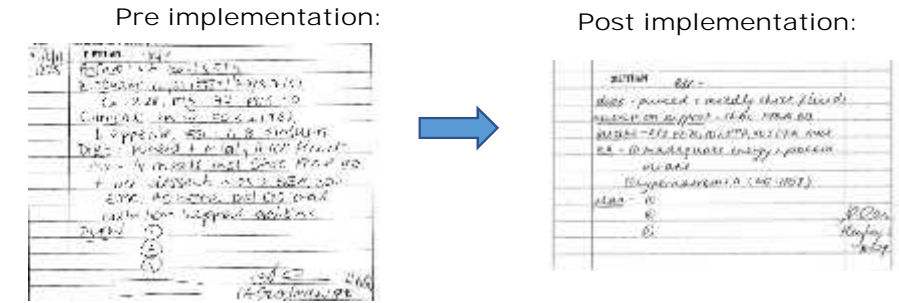

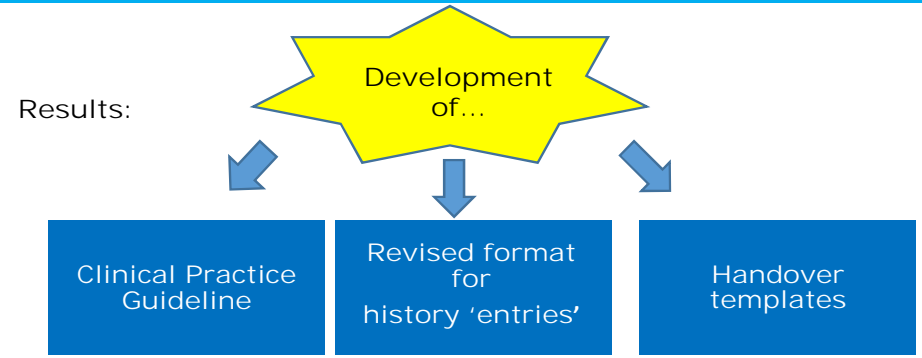

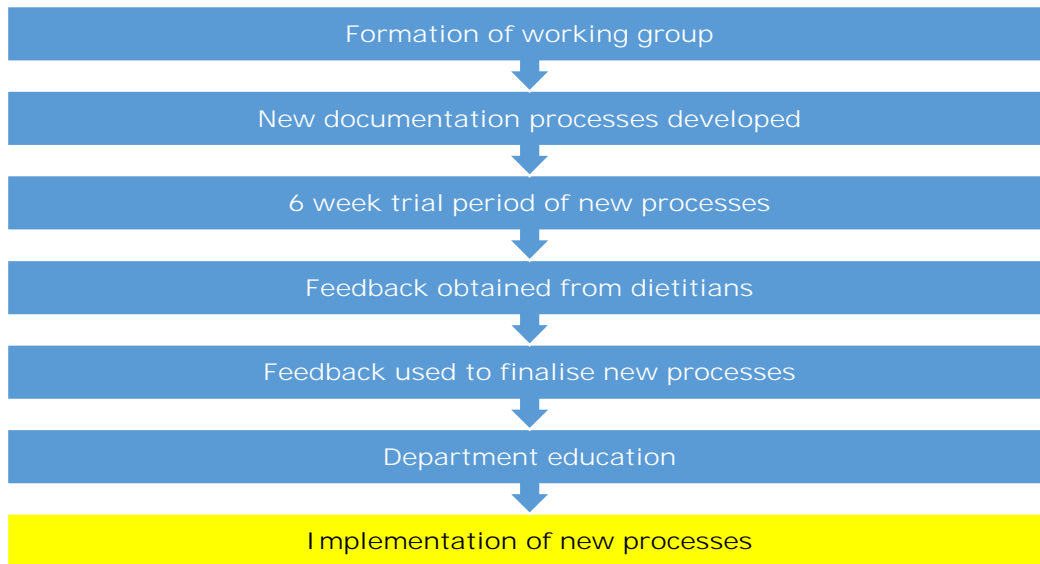

Goodman A, Collins H, Edis K, Dowie R
 Nutrition Department, Peninsula Health, Frankston, Victoria. Ph: 97842742

Aim: To streamline documentation and clinical handover processes for dietitians

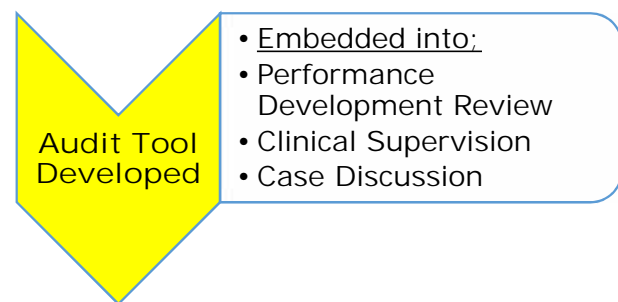

Background: Focus groups from a Clinicians in Redesign project identified the following issues with allied health (AH) documentation;

- Duplication
- Excessive time spent documenting
- Too much information included in progress notes
- Varied approach to clinical handover
- Only 33% of medical and nursing staff read 'body' of progress notes where as 93% read the 'plan'

Method:
