

Heartoon topics

Seven education topics, aligned with existing face to face education sessions, were developed into short evidence based animated videos in an easy to understand format.

Benefits of Heartoon

- ✓ Available to clients and their families at a time and place suitable to them.
- ✓ Clients will not miss important information when unable to attend.
- ✓ Engaging format for clients with lower health literacy.
- ✓ Suitable for clients with English as a second language.
- ✓ Voiceover can be done in other languages.
- ✓ Innovative use of technology.

"The information was good. It was reinforced in several of the videos."

HEARTOON

A multimedia, multidisciplinary approach to Cardiac Rehabilitation.

The HEARTOON project developed a comprehensive heart health e-learning resource using VideoScribe animation software with voiceover.

Heartoon is providing Cardiac Rehabilitation clients with health information in an interesting and engaging format, that can be accessed at a time and place suitable to each individual client and their family.

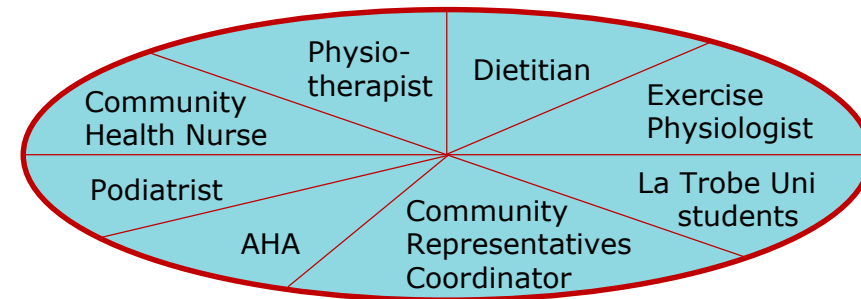

Heartoon development

1. Internal organisation innovation project.
2. Collaborative consultation sessions with program staff.
3. Clinicians summarised evidence & information used in presentation of their talks.
4. Clinicians wrote scripts from their session information.
5. Scripts reviewed by project leads, Community Representatives Committee & program clients.
6. Animations developed to support scripts.
7. Voiceovers recorded & attached to videos.
8. Initial video shown to Community Representative Committee for review.
9. Videos produced on USB & reviewed by program clients.
10. Copies of Heartoon USB made available for provision to program clients.

"It was really good. Easy to watch and understand."
